

Lawra Dodge is founder and President of Excel Environmental Resources, a full-service environmental engineering and consulting firm located in North Brunswick, NJ. She is a licensed Professional Geologist with 31 years of experience as an environmental consultant working with industrial, commercial, and residential property owners, developers, and builders as well as municipalities, redevelopment authorities, and non-profit organizations across the State.

Ms. Dodge is a recognized expert in contaminated property investigation, remediation, and redevelopment for industrial, military, commercial, residential, and municipal properties. She has hands-on experience with remediation and redevelopment of some of the largest and most challenging properties in New Jersey, New York, and Pennsylvania.

Ms. Dodge works closely with both the public and private sector to successfully navigate through the intricacies of the contaminated property remediation and redevelopment process. She has designed and implemented creative and forward-thinking solutions to environmental and funding challenges with a relentless commitment to achieving a win-win for both the public and private sector stakeholders.

In 2010, she was appointed by the Governor to serve on the NJ Site Remediation Professionals Licensing Board that oversees the Licensed Site Remediation Professional (LSRP) Program and chairs the Continuing Education Committee and is a member of several other Board committees. Ms. Dodge also serves on the advisory board of a North Jersey Habitat for Humanity organization and on the Brownfields Development Area Steering Committee and/or Redevelopment Team of several NJ municipalities and cities.
